

N.B. Andrews, MD

Dr. Andrews is a US trained and certified neurosurgeon with an excellent international reputation spanning two decades.

He is well versed in modern techniques for the surgical management of intracranial and spinal diseases.

His clinical practice is characterised by a strict adherence to the best international standards in the management of neurologic diseases. An innovative leader in African neurosurgery,

He introduced the state of the art techniques of minimally invasive neurosurgery (stereotactic surgery, neuroendoscopy and microneurosurgery) into West Africa.

He led a team of Global experts to perform the first brain surgery for the treatment of Parkinson's disease in Africa.
